
2nd place-Horizon Consulting Group

Subhajit Das Gupta

School: UT Southwestern Medical Center

Program & Year of Study: Ph.D. 5th year, IM (Cardiology)

One thing I enjoyed the most about the case competition: It was very professionally handled, and that made me want to give my 100%. Kudos!

Bio: I'm a scientist interested in creating an efficient flow of money through institutions, that creates maximum value for society as a whole. Consulting helps me solve interesting problems in this regard, hence I want to become one after my PhD.

Lauren Wallon

School: NYU School of Medicine

Program & Year of Study: PhD Candidate: Year 4, Drug Development and Molecular Biophysics

One thing I enjoyed the most about the case competition: It was very professionally handled, and that made me want to give my 100%. Kudos!

Bio: I Lauren is in the process of completing her PhD under the advisement of Dr. Shohei Koide. Over the past year, she has worked in a diverse number of investing roles in addition to taking coursework through the NYU Stern School of Business. After graduating, she plans to continue working at the intersection of business and science.

Dailu Chen

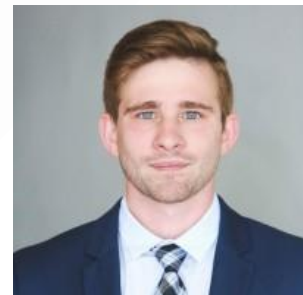

School: UT Southwestern Medical Center

Program & Year of Study: 5th year in Molecular Biophysics

One thing I enjoyed the most about the case competition: What I enjoyed most about this competition was that we were provided with valuable feedback from judges. I also appreciated the well thought-out logistics as well as the networking events!

Bio: I'm a PhD candidate using biophysical tools to understand protein aggregation in neurodegenerative diseases. I'm passionate about learning business strategy with an aim to translate good science into social value.

Stefan Prisacaru

School: UT Southwestern Medical Center

Program & Year of Study: Medical Doctor, 3rd year

One thing I enjoyed the most about the case competition: I loved the opportunity to meet and work with colleagues from across the nation!

Bio: I'm a medical student passionate about the intersection of healthcare and business. After graduation, I hope to use my knowledge of patient care and passion for business to guide executives in furthering patient-care innovation and impact while maximizing societal value.

David Allyn

School: University of Pennsylvania

Program & Year of Study: Master's Student (Biotechnology)

Bio: My name is David Allyn, and I'm a biotechnology master's student at the University of Pennsylvania. My career interests include consulting, venture capital, and business development. Ultimately, I aspire to build a company in the biomedical space.

Faheem Amir Solangi

School: UCLA

Program & Year of Study: Postdoc, 2nd Year (Dentistry - Biomaterials)
